

Accreditation No: LAB 169

Awarded to

Al Mizan Industrial Solutions W.L.L, P.O Box:16690, Doha, Qatar.

The scope of accreditation is in accordance with the standard specifications outlined in the following page(s) of this document. The accredited scope shall be visible and legible in areas such as customer service, sample-receiving section etc and shall not mislead its users.

The accreditation was first time granted on **25-01-2019** by Pakistan National Accreditation Council.

The laboratory complies with the requirements of ISO/IEC 17025:2017.

The accreditation requires regular surveillance, and is valid until 24-01-2025.

The decision of accreditation made by Pakistan National Accreditation Council implies that the organization has been found to fulfill the requirements for accreditation within the scope.

The organization however, itself is responsible for the results of performed measurements/tests.

PAKISTAN NATIONAL ACCREDITATION COUNCIL

<u>14-03-2024</u> Date <u>SD</u> Director General

Calibration Laboratory.

Accreditation Scope of Al Mizan Industrial Solutions Lab. Doha City, Qatar Country.

Permanent laboratory premises X

Field of measurement: Temperature Measurement			
Measured quantity	Range	*Expanded Uncertainty	Technique, Reference
		· (<u>+</u>)	Standard, Equipment
Digital Thermometer			DKD-R5-1, Ametek
			Jofra-CTC-140A
			Temperature Dry Block
			Calibrator with
	-15 °C to 10 °C	± 0.62 °C	Temperature Indicator, Temperature Gauges,
	10 °C to 50 °C	± 0.74 °C	Temperature Recorder, Temperature Switches,
	50 °C to 140 °C	± 0.79 °C	Temperature Transmitter,
			Temperature Controllers ,
			Digital Temperature
			Indicators,
			Thermocouples, RTDS
Field of measurement: Pressure Measurement			
Pressure			DKD-R6-1, Nagman
			Pressure Comparator /
			Pressure Pump With
	-1 to 0 bar	± 0.29 bar	Pressure Indicator,
			Pressure Gauge Pressure
	0 to 10 bar	± 0.58 bar	Switches, Pressure
			transmitters, Pressure
	10 to 20 bar	± 0.68 bar	chart Recorders Digital
			Pressure Indicators,
			Pressure controllers and
			Vaccum Gauges

* Expanded Uncertainty:

Expanded Uncertainty is the measurement uncertainty at a coverage probability of 95 %, which usually requires the use of a coverage factor of k = 2. This measurement uncertainty is a value for which the laboratory has been accredited using the procedure that was the subject of assessment. In certificates issued under its accreditation scope an accredited laboratory is not permitted to quote an uncertainty that is smaller than the published uncertainty for respective ranges as given above.
